Graduate Learning Objectives/Outcomes for Ph.D. & MS Programs
CHEMISTRY, College of Science

The following table indicates what we have identified as “universal” graduate learning objectives, by which we assess graduate learning outcomes; also for each we include the broadly used means of assessment. Individual programs and Departments may have additional graduate learning objectives; most often these are explicitly stated in a Departmental Graduate Handbook, in documentation provided by a professional organization or society, or included as degree requirements. The overarching objectives in the table address what are considered to be critical areas of competency (a comprehensive appreciation of the field of study, an understanding of current issues of importance in the field, a grounding in ethics, and a demonstration of creativity) at various points on the path through graduate studies (admissions, matriculation to candidacy, graduation). Some of the objectives apply to any degree program, and some are specific to the non-thesis (coursework) MS, the non-thesis (project) MS, the thesis MS, or the PhD, as indicated. Likewise there is some variation amongst the degree programs as regards means of assessment.

Means of assessment referenced in the table below include:

1. minimum admission standards, assessment of application materials, admissions process interviews;
2. meeting a predetermined standard in graduate level coursework (content/subject matter and GPA);
3. graded cumulative exams;
4. a pass/fail oral preliminary exam;
5. written thesis or research paper;
6. oral defense;
7. other (as indicated).

<tbody>
<tr>
<td>1. Problem Definition: Has stated the research problem clearly, providing motivation for undertaking the research</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>2. Literature and Previous Work: Demonstrated sound knowledge of literature in the area, and of prior work on the specific research problem</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>3. Impact of Proposed Research: Demonstrated the potential value of solution to the research problem in advancing knowledge within the area of study</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>4. Solution Approach: Has applied sound state-of-the field research methods/tools to solve the defined problem and has described the methods/tools effectively</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>5. Results: Analyzed and interpreted research results/data effectively</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>6. Quality of Written Communication: Communicates research results clearly and professionally in written form</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>7. Quality of Oral Communication: Communicates research results clearly and professionally in oral form</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>8. Critical Thinking: Has demonstrated capability for independent research in the area of study and expertise in the area</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>9. Broader Impact: Demonstrated awareness of broader implications of the concluded research. Broader implications may include social, economic, technical, ethical, business, etc. aspects.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>10. Publications: Journal or conference publications have resulted (or are anticipated) from this research</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Overall Assessment: The assessment of the overall performance of the candidate based on the evidence provided in items 1 – 10 above.

**Mapping Guide for the Ph.D. Degree - Chemistry**

Only the top 5 activities are listed for each outcome. Other activities may also support the outcomes, however data will be collected for those listed in each column.

<table>
<thead>
<tr>
<th>Learning Outcomes:</th>
<th>Outcome 1: Knowledge and Scholarship</th>
<th>Outcome 2: Communication</th>
<th>Outcome 3: Critical Thinking and Problem Solving</th>
<th>Outcome 4: Ethical Conduct</th>
<th>Outcome 5: Professional Development</th>
</tr>
</thead>
<tbody>
<tr>
<td>Graduate students in the PhD program will demonstrate</td>
<td>Identify and conduct original research, scholarship or creative endeavors</td>
<td>Effectively communicate their field of study</td>
<td>Think critically, creatively and solve problems in their field of study</td>
<td>Conduct research in an ethical and responsible manner</td>
<td>Demonstrate attributes of professional development consistent with expectations within their field of study</td>
</tr>
</tbody>
</table>

1. **Teaching Seminar** (one time for all incoming graduate students)
2. **Research Seminar** (for advanced 2nd or 3rd year PhD students)
3. **Plan of Study Coursework**
4. **Research credits**

- Gain knowledge needed for conducting original research
- Earn a Satisfactory in at least 81 credits of CH 603
- Critically analyze ideas and data presented and discussed by others and participate in the peer review process
- Attend workshops or take online training on effective service as a TA and responsible conduct of research
- Participate in discussions on responsible conduct of research
- Gain appreciation for membership in professional societies; Attend scientific seminars across campus
- Understand the importance of membership in professional societies; Organize a departmental seminar with an invited speaker; Participate in a graduate research competition; Attend at least one professional development workshop
- Earn a Satisfactory in at least 81 credits of CH 603
<table>
<thead>
<tr>
<th>5. PhD Research Proposal</th>
<th>Define and justify a set of original research objectives in a formal research proposal</th>
<th>Write and defend an original proposal</th>
<th>Define and defend a set of research methods and analyses that will achieve the research objectives</th>
<th>Define methods to achieve the research objectives in an ethical and responsible manner</th>
</tr>
</thead>
<tbody>
<tr>
<td>6. Written and Oral Preliminary Exam</td>
<td>Demonstrate sufficient knowledge of subject matter to become a PhD Candidate</td>
<td>Demonstrate ability to communicate knowledge and research through a written and oral preliminary exam</td>
<td>Demonstrate the ability to think clearly and solve problems through a written and oral preliminary exam</td>
<td>Publish research, extension, or teaching results in peer-reviewed and/or other outlets</td>
</tr>
<tr>
<td>7. Publish Research in Appropriate Outlets</td>
<td></td>
<td>Submit manuscripts for publication in the peer-reviewed literature</td>
<td></td>
<td>Present an oral presentation or poster to a professional audience</td>
</tr>
<tr>
<td>8. Presentation of Research at Appropriate Venues</td>
<td></td>
<td>Present an oral presentation or poster to a professional audience</td>
<td></td>
<td>Present an oral presentation or poster to a professional audience</td>
</tr>
<tr>
<td>9. Ph.D. Dissertation</td>
<td>Prepare a dissertation that meets expectations for original, independent research</td>
<td>Prepare a dissertation that demonstrates critical thinking and creativity</td>
<td>Prepare a dissertation based on ethical and responsible research.</td>
<td></td>
</tr>
<tr>
<td>10. Dissertation Defense</td>
<td>Present the research in a public seminar and defend the dissertation</td>
<td>Defend the dissertation research before the student's Advisory Committee</td>
<td>Present the dissertation research in a public seminar and defend the dissertation research before the student's Advisory Committee</td>
<td></td>
</tr>
</tbody>
</table>
